Conclusion	We have tested the product for OWASP Vulnerabilities & Application is safe for hosting.

- The production server should have operating system and web server hardening done and ensure security patches regularly.
- Web Application should communicate over valid HTTPS certificate.
- Security Audit was performed on Production URL.
- The security audit was conducted using a combination of black-box and grey-box (credential) testing.
- Sanitized logging and regular monitoring of the logs is recommended which are to be maintained for at least one year.
- If there are any changes to the application code, the new version will need to be re-audited.
- The certificate is generated based on the Enclosed Security Audit Completion Report.
- The certification is valid till no changes are done on the application's dynamic content or One Year from the date of issue whichever is earlier.
- The QR code serves as verifiable proof of audit completion.

Note: Our opinion is valid for the period during which the changes are not made in the tested application thus any changes in the system will require to re-audit of application's new version. Projections of any conclusions based on our current findings will not be applicable and has to be altered for future period and application new versions is subject to any risks because of changes made to the application or system.
